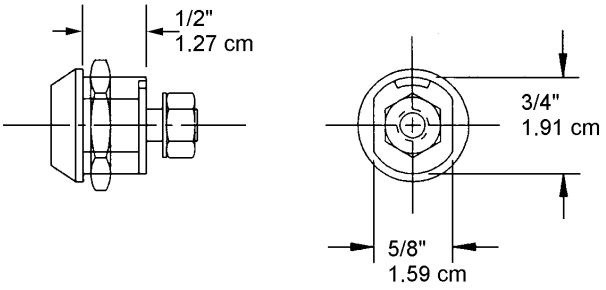
Locks and Cams

Locks for key switches, the I/O assembly, CD ROM door, and the Pentium assembly are installed at the factory. Cams are provided for the doors and other security locks that the Operator must purchase.



Single or dual lock configurations are possible. All lock openings are $^{5}/_{8}$" (1.59cm) by $^{3}/_{4}$" (1.91cm). The locks are 90 degree rotation. The keys should be removable only in the locked position.

Locks $1^{1}/_{8}$" (2.86cm) long can be used with spacers to maintain the $^{1}/_{2}$" (1.27cm) lock length.
