

Pluto

Pluto 5 "FastTrack"

This "FastTrack" software is designed for customers who want to significantly speed up the development time of their games. All the low-level software you need is provided – all you have to do is write the game. High level library functions are also included for easy game programming. We have also provided a modular user friendly software interface, making it easy for game developers to select which devices they need. New drivers will be made available on an ongoing basis.

What you buy

The FastTrack Software includes:

- 1) Full suite of system software including sample game
- 3) Multi-user licence for the software
- 3) One day training session
- 4) Telephone and e-mail support
- 5) One years upgrade and maintenance cover with renewal option

Reference Design Machine

A reference design machine is also available. This enables game designers to start writing games before they have had their own prototype machine made.

The reference design machine includes a **Pluto 5 Casino Board** that is housed in a box on the side of the machine for easy access. You can then easily plug in different peripheral devices, etc. as required.
